

## **Will Outsourcing Payroll Make Your Life Easier?**

You went into business to pursue a passion, fulfill a dream! No business owner looks forward to wading through the mountains of paperwork related to payroll . So Payroll outsourcing is very important for the enterprises. It will relieve you of the hassles and technicalities of running a business so you can focus on what you do best. You can rest assured that your employees are receiving the best in benefits and that your business is in compliance and running smoothly. With that peace of mind, you'll be free to focus on building your business.

Besides maximum expenses are being incurred on the manpower so as to have more efficiency and output from the manpower employed. So, payroll outsourcing plays a very important role to minimise your cost in each and every Organization.

Plus, without the proper knowledge of payroll procedure and access to sound business payroll solutions, it is easy to make mistakes.

Employees as well as federal, state, and local tax collection agencies need to be paid in full, on time, and in the proper manner. Usually, late payments are cause for monetary penalties. And given the ever-changing nature of tax regulations, it is easy to make an error that can significantly affect your bottom line.

### **Payroll Processing**

Basic payroll processing services include calculating paycheck and tax obligations for each employee, printing and delivering checks, and providing management reports. Paychecks can be issued on a weekly, bi-weekly, monthly, semi-monthly or yearly basis.

#### *Filing taxes*

Many payroll services offer the option of filing state and federal payroll taxes for your business. This can be a great feature given the fact that the Internal Revenue Service has reported that one out of every three employers has been charged for a payroll mistake, with total penalties reaching into the billions of dollars.

This payroll tax filing service is offered at little or no cost. This is because the provider will impound the tax due at the time paychecks are issued, earning interest on the funds until the money needs to be handed over to the government.

### **Method**

The standard method is by modem. The provider will supply you with software for tracking each employee's pay rate, deductions, and vacation time. Once you enter the information for the pay period, the software dials in to the provider's server and transmits the information.

Some providers also offer Web-based employee payroll data entry. You enter employee information on a secure Web page, which feeds directly to the provider. This method is gaining acceptance, but is still less popular than modem-based communication.

Your tax filing can be handled electronically as well. With the Electronic Federal Tax Payment System (EFTPS), your company transfers funds electronically to pay taxes due, rather than relying on checks.
